

MARIA ROSELIND

SUMMARY

Artificial Intelligence and Machine Learning undergraduate with experience in Python, AI-based applications, and software development. Skilled in developing projects involving NLP, chatbot systems, database management and real-time processing concepts. Interested in building practical AI and software solutions in collaborative development environments.

EDUCATION

Mar Athanasius College of Engineering, Kothamangalam Sep 2023 – Present
Bachelor of Technology in Artificial Intelligence and Machine Learning
Current CGPA: 8.34

EXPERIENCE

Neuvotech Systems LLP, Kochi Jun 2025
Software Development Intern

- Contributed to the development and deployment of application modules for Bell Farms and Bell Motors projects.
- Assisted in improving frontend design and application usability for better user experience.
- Collaborated with the development team in implementing and testing application features.

LEADERSHIP

Chief Financial Officer (CFO), IEDC MACE Jul 2025 – Present

- Supporting budget management and financial planning activities for innovation and entrepreneurship events organized by IEDC MACE.

PROJECTS

Real-Time Audio to Sign Language Video Generation GitHub

- Developing a multimodal AI-based system that converts speech into expressive sign language videos using NLP, emotion detection, speech processing, and Blender animation techniques.

Melo Chatbot GitHub

- Developed an AI-powered chatbot to provide academic and event-related information for students using search-based response handling and web technologies.

Movie Recommendation Website

- Developed a SQL-based movie recommendation website that suggests movies based on user interests and preferences.

SKILLS

- Programming Languages:** Python, Java, C, C++, R, SQL
- Technologies & Concepts:** Artificial Intelligence, Machine Learning, NLP, Database Management, Web Development
- Tools & Platforms:** Git, VS Code, Google Colab, Blender, Canva, Excel
- Database:** MySQL

HACKATHONS & PARTICIPATION

Takshak (2025), Sanskriti (2025, 2026):

- Supported the coordination and management of technical and cultural events through team collaboration and event organization activities.

Think-Her Hack (2024):

- Participated in the All Kerala Girls Hackathon by ThinkerHub and collaborated on developing a chatbot for providing academic and event-related updates to students.

NASA Space Apps Challenge (2023):

- Participated in the NASA Space Apps Challenge hackathon and worked in a collaborative environment to explore innovative problem-solving approaches.

Xelerate Startup Bootcamp (2023):

- Designed a travel planning application prototype using Figma with focus on user experience and booking workflow design.
