

MARIA ROSELIND

SUMMARY

Artificial Intelligence and Machine Learning undergraduate with experience in Python, AI applications, and software development. Skilled in developing projects involving NLP, chatbot systems, database management, and real-time processing. Interested in building practical AI and software solutions in collaborative environments.

EDUCATION

Mar Athanasius College of Engineering, Kothamangalam Sep 2023 – Present
Bachelor of Technology in Artificial Intelligence and Machine Learning
Current CGPA: 8.34

EXPERIENCE

Indian Institute of Information Technology (IIIT) Kottayam Jun 2026 – Present
Project Intern

- Working on cryptocurrency transaction analysis for fraud detection using graph-based techniques.
- Analyzing Bitcoin transaction networks using the Elliptic++ dataset.

Neuvotech Systems LLP, Kochi Jun 2025
Software Development Intern

- Contributed to the development and deployment of application modules for Bell Farms and Bell Motors.
- Assisted in improving frontend design and application usability.

LEADERSHIP

Chief Financial Officer (CFO), IEDC MACE Jul 2025 – Present
• Managing budgets and financial planning for innovation and entrepreneurship events.

PROJECTS

Real-Time Audio to Sign Language Video Generation GitHub
• Developing a multimodal AI-based system that converts speech into expressive sign language videos using NLP, emotion detection, speech processing, and Blender animation techniques.

Smart Video Summarizer GitHub
• Developed a Streamlit web app integrated with Groq Cloud (Llama-3.1) to parse YouTube transcripts into dynamic formats, engineering a token-truncation algorithm to safely bypass free-tier API rate limits.

RAG-Powered AI Research Assistant GitHub
• Developed a local-first RAG platform using LangChain, FAISS, and Groq Cloud (Llama-3.1) to parse multi-format research papers and deliver sub-second contextual answers with live citations.

SKILLS

Programming Languages: Python, Java, C, C++, R, SQL, Bash
Technical Skills: Artificial Intelligence, Machine Learning, Natural Language Processing, Web Development
Frameworks & Libraries: Streamlit, Flask, FastAPI, NumPy, Pandas, TensorFlow, Scikit-learn
Databases & Deployment: MySQL, GitHub Pages, Vercel
Tools & Platforms: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Google Sheets, Excel

HACKATHONS & PARTICIPATION

Takshak (2025), Sanskriti (2025, 2026):
• Supported the coordination and management of technical and cultural events through team collaboration and event organization activities.

Think-Her Hack (2024):
• Participated in the All Kerala Girls Hackathon by ThinkerHub and collaborated on developing a chatbot for providing academic and event-related updates to students.

NASA Space Apps Challenge (2023):
• Participated in the NASA Space Apps Challenge hackathon and worked in a collaborative environment to explore innovative problem-solving approaches.

Xelerate Startup Bootcamp (2023):
• Designed a travel planning application prototype using Figma with focus on better user experience.
